

# Manage Classroom Learning with AirWatch Teacher Tools

As mobile learning continues to define the next-generation of education, schools are looking to integrate mobility into the classroom in a safe and seamless manner with minimal disruptions. With mobile technology, empower your teachers to improve classroom management and guide digital learning for students.

AirWatch® Teacher Tools enables teachers to guide mobile learning by managing student devices, apps and content using a simple interface. AirWatch Teacher Tools includes two applications: one for instructors, AirWatch® Teach and one for students, AirWatch® Learn. Developed specifically for the classroom, AirWatch Teacher Tools enables schools to integrate mobile technology into instruction, improve teacher-student collaboration, personalize instruction to individual learning styles, and give teachers control of classroom devices. With these tools, teachers are empowered to adopt new teaching models that demand a more personalized learning pathway for each student. AirWatch Teacher Tools places essential device management capabilities in the hands of teachers to reduce reliance on IT administrators.

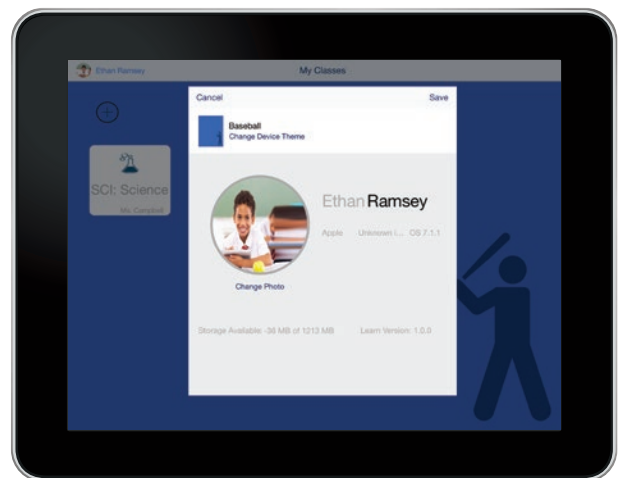

## Empower Teachers with AirWatch Teach

- Guide mobile learning and personalize instruction
- Facilitate newly adopted teaching models
- Balance classroom device management between teachers and IT

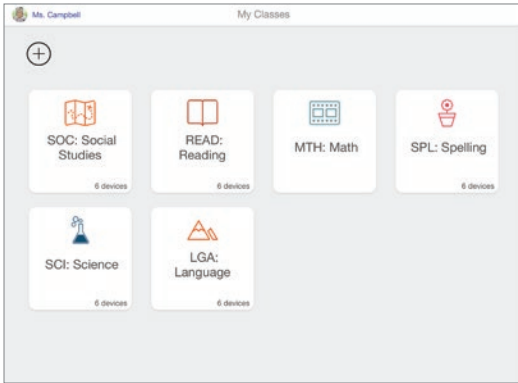

## Engage Students with AirWatch Learn

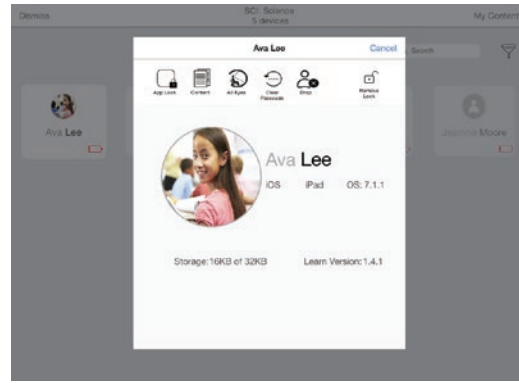

- Lock into educational apps, content and websites
- View each class and all shared content
- Collaborate with teachers and peers

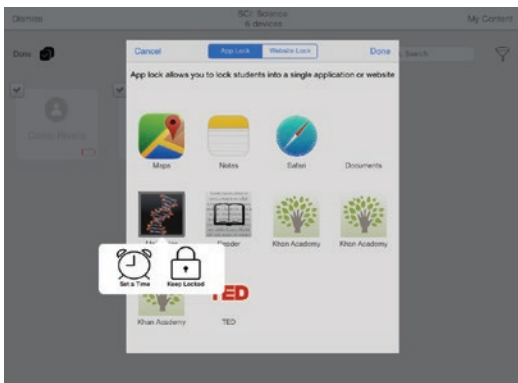

## AirWatch Teach

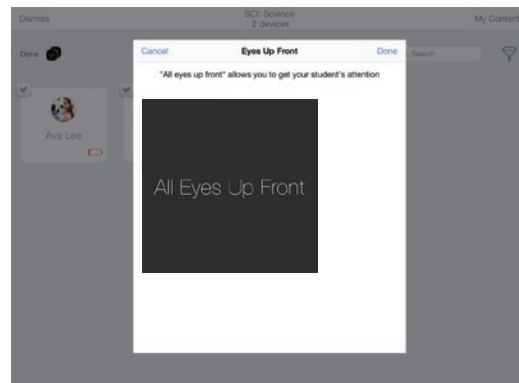

Create classes, add students and relevant content

View student device information and perform commands, including clear passcode

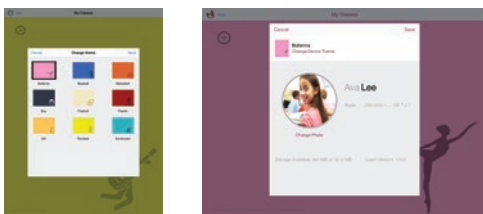

Lock students, small groups or the whole class into approved apps, shared content or URLs for a specified time or at will

Enable **All Eyes Up Front** to temporarily disable student devices and command attention to the front of the classroom

## AirWatch Learn

Customize with wallpaper and profile images

View all classes and search for shared content by class
